

Compact Footprint Serious Output

Built for fast, repeatable hinge prep on jambs.

Three simultaneous heads reduce cycle time while keeping operation simple and consistent.

Cycle Times!

Designed & Engineered for Dedicated Jamb Production

- **3-Head Machining:** Simultaneous heads reduce cycle time across hinge patterns.
- **3 or 4 Hinge Jambs:** Handles both hinge layouts on one dedicated machine.
- **Compact Footprint:** Fits high-output production into limited floor space.
- **Simple Operation:** Touchscreen controls and automatic ejection keep cycles moving.

Footprint & Requirements

Length: 11'
Width: 5'
Height: 5' 5"
Weight: 1,587 lbs

Electrical Power: 600 V / 3-phase
Ethernet: Internet / RJ45
Air Pressure: 100 PSI / 5 CFM
Footprint: 55 sq. ft

Machining Capabilities

Jamb Capacity

Max Length: 96"
Width: 3 1/2" - 12"
Rabbit: 1" Max

Materials

Wood
PVC
Composite

Built For

- Speed without added complexity
- Hinge-prep bottlenecks
- Repetitive jamb patterns
- Limited floor space

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Easy Maintenance

Simple architecture, remote connectivity, and accessible components support easier maintenance.

Cut Pattern Control

Touchscreen HMI with adjustable speed, cycle settings, and hinge pattern access for fast setup and repeatable layouts.

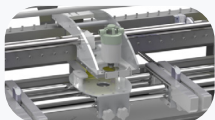

Precision Control

Pneumatic clamps, mobile stops, and side references help secure each jamb for stable, repeatable hinge machining.

High Output

A simple design and multiple machining heads help deliver fast, repeatable results in a compact footprint.
