

Flexible Machining Extended Capacity

Built to machine long jambs and frame components with compact, repeatable CNC control.

The ANNY CN-A combines 3-axis machining, automatic clamp sensing, probing, and open-end access to support flexible jamb production across a wide range of part lengths.

Cycle Times!

Designed & Engineered for Real-World Performance

- **No G-Code:** Faster setup with less operator dependency.
- **Custom Cut Library:** Tailored to current and future production needs.
- **ERP + Barcode Integration:** Streamlines workflow and reduces manual entry.
- **Long-Part Capacity:** Open-end access supports jambs and frame components up to 160”.

Footprint & Requirements

Length: 11' 1"
Width: 4' 8"
Height: 6' 7"
Weight: 2,500 lbs

Electrical Power: 480 V / 3-phase
Ethernet: Internet / RJ45
Air Pressure: 100 PSI / 15 CFM
Footprint: 52 sq. ft.

Machining Capabilities

Jamb Capacity

Length: 18"–160"
Max Width: 9"
Max Thickness: 2 ½"

Materials

Wood
PVC
Composite
Aluminum

Core Operations

- Long-part cutting, routing, & drilling
- Cutouts, notching, & hardware prep
- Jamb, astragal, mullion & sill machining

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Safety Systems

Integrated sensors, interlocks, and pre-cycle checks help control access and reduce operator exposure.

Remote Support

Remote diagnostics, HMI monitoring, and real-time support help keep production operational.

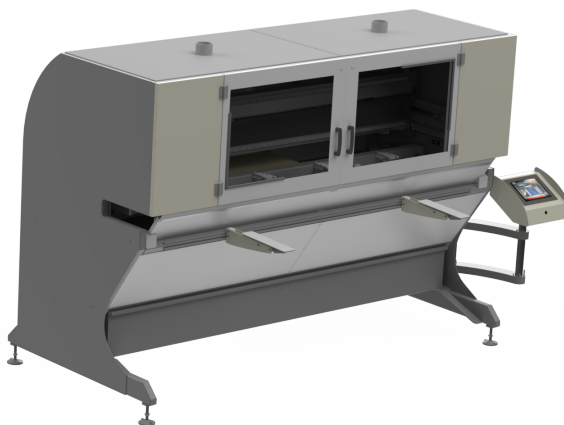

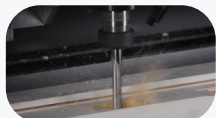

Precision Setup

Versatile clamping, part referencing, and probe setup help support accurate, repeatable machining.

Enclosed Design

Helps contain machining debris for safer operation, with collection bins for cleaner daily cleanup.
