

Smarter Machining Stronger Production

Built to centralize critical frame machining in one CNC station.

Reduce handling, improve safety, and deliver consistent, repeatable production.

Watch In Action!

Designed & Engineered for Real-World Performance

- **No G-Code:** Faster setup with less operator dependency.
- **Custom Cut Library:** Tailored to current and future production needs.
- **ERP + Barcode Integration:** Streamlines workflow and reduces manual entry.
- **Precision Probing:** Improves precision, repeatability, and setup accuracy.

Footprint & Requirements

Length: 14' 7"
Width: 6' 11"
Height: 9'
Weight: 4,750 lbs

Electrical Power: 480 V / 3-phase
Ethernet: Internet / RJ45
Air Pressure: 100 PSI / 15 CFM
Footprint: 101 sq. ft.

Machining Capabilities

Jamb Capacity

Length: 20"–107"
Max Width: 14"
Max Thickness: 3 1/4"

Materials

Wood
PVC
Composite
Aluminum

Core Operations

- Jamb, astragal, mullion & sill
- Hinges, locks, & strike machining
- Flush bolts, notching, & cutdowns
- Angled cuts, drilling, & routing

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Safety Systems

Integrated sensors, interlocks, and pre-cycle checks help control access and reduce operator exposure.

Remote Support

Remote diagnostics, HMI monitoring, and real-time support help keep production operational.

Precision Setup

Pneumatic clamping, part referencing, and dual probing help stabilize each component for precise, repeatable machining.

Enclosed Design

Helps contain machining debris for safer operation, with collection bins for cleaner daily cleanup.
