

Versatile Machining

Higher Output

Built to automate door machining with fast, repeatable CNC control.

The Kathy KS-S handles surface and edge operations with automatic width adjustment, two independent machining heads, and a connected workflow.

Watch In Action!

Designed & Engineered for Automated Door Production

- **Two Independent Heads:** Surface and edge machining work together for faster, more flexible production.
- **Infeed and Outfeed Automation:** Configurable for same-side or pass-through flow to match layout needs.
- **Enclosed Design:** Safer, cleaner machining with controlled cutout waste handling.
- **ERP + Barcode Integration:** Streamlines workflow and reduces manual entry.

Footprint & Requirements

Length: 13' 7"
Width: 10' 1"
Height: 6' 6"
Weight: 8,000 lbs

Electrical Power: 480 V / 3-phase
Ethernet: Internet / RJ45
Air Pressure: 100 PSI / 20 CFM
Footprint: 137 sq. ft.

Machining Capabilities

Machining Range

- Glass cutouts and specialty shapes
- Edge bore and edge pocket
- Flush bolts and multipoint grooves
- Hardware, hinge, and mortise lock preparation

Materials

Wood
PVC
Composite
Steel
Aluminum

Door Capacity

Height: Up to 96"
Width: 9 7/8" – 41 3/4"
Thickness: 1 3/8" – 1 3/4"

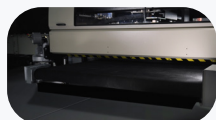

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Clean Operation

Air blower support and a waste conveyor help maintain a cleaner machining area and cleaner door exit.

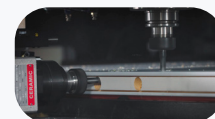

Remote Support

Remote diagnostics, HMI monitoring, and real-time support help keep production operational.

Precision Setup

Automatic width adjustment, door tightening, hard stoppers, and references help position doors for repeatable machining.

Tooling Flexibility

A 4-space tool changer and configurable tooling support a wide range of door machining applications.

Cycle Times!
