

Smoother Transfer Seamless Workflow

Built to automate door transfer between production stations with smooth, controlled movement.

The Tracy TM-E uses motorized non-marking urethane rollers, adjustable height, and a robust frame to support safer handling, cleaner flow, and better line integration.

Learn More!

Designed and Engineered for Production Flow

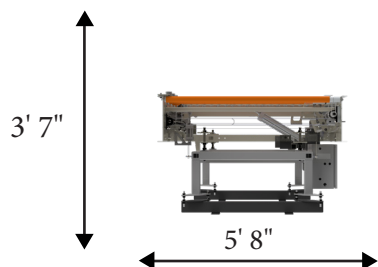

- **Motorized Transfer:** Moves doors smoothly between stations with less manual handling.
- **Surface Protection:** Non-marking urethane rollers help reduce scratches and handling damage.
- **Line Integration:** Designed to work with Eugénie equipment and automated door workflows.

Length: 8' 6"
Width: 5' 8"
Height: 3'-3' 7"
Weight: 1,687 lbs

Ethernet: Internet / RJ45
Air Pressure: 100 PSI
Footprint: 48 sq. ft.

Available Conveyor Models

- **TM-E:** Motorized conveyor for automated lines.
- **TG-C:** Free-roller for manual transfer.
- **TG-F:** Free-roller for safe vertical transfer.
- **TM-I:** Scrap conveyor for waste evacuation.

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Automation Systems

Synchronizes door detection with stations, triggers next steps with lasers, and supports measurement with optional side guides.

Low Maintenance

High-quality components, robust conveyor design, and remote diagnostics help simplify upkeep and keep production moving.

Door Protection

Urethane-covered rollers help protect door surfaces, while automated transfer reduces lifting, loading, and unloading strain.

Layout Flexibility

Modular configurations, adjustable height, and flexible infeed/outfeed options adapt to your production flow.
