

Modular Machining Scalable Production

Built to consolidate jamb machining into one expandable CNC platform.

Reduce manual handling, eliminate bottlenecks, and scale production with modular heads, dedicated cutting options, and automation-ready configurations.

Cycle Times!

Designed & Engineered for Real-World Performance

- **Scalable Platform:** Start with one CNC head and expand as production grows.
- **Automation Ready:** Multiple feeding systems available based on production needs.
- **Dedicated Modules:** Saw and dado tools help reduce bottlenecks.
- **ERP + Barcode Integration:** Streamlines workflow and reduces manual entry.

Footprint & Requirements

Length: 12' 6"
Width: 5' 10"
Height: 6' 8"
Weight: 4500 lbs

Electrical Power: 480 V / 3-phase
Ethernet: Internet / RJ45
Air Pressure: 100 PSI / 15 CFM
Footprint: 73 sq. ft.

Machining Capabilities

Core Operations

- Jamb, astragal, & mullion machining
- Hinges, locks, & strike machining
- Flush bolts, notching, & cutdowns
- Angled cuts, drilling, & routing

Jamb Capacity

Jamb capacity are configuration-dependent and pending final technical confirmation.

Materials

Wood
PVC
Composite
Aluminum

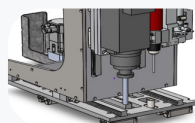

20+ Years of Door Industry Experience

Eugénie helps exterior door manufacturers build more capable, reliable, and scalable production lines. Every machine is backed by hands-on expertise from layout and commissioning to support, optimization, and future growth.

Flexible Investment

Build the machine around today's needs while preserving room for future production growth.

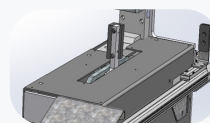

Dedicated Cutting

Saw heads and dado modules separate long cutting operations from CNC machining to reduce bottlenecks.

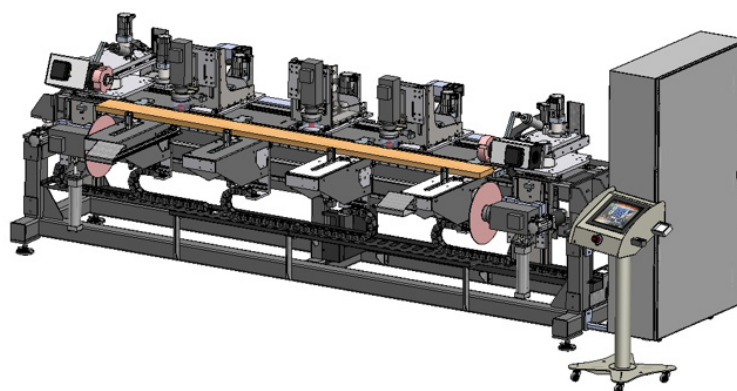

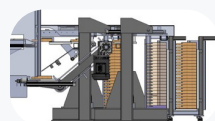

Configurable Flow

Manual or servo clamp packages and ejector options help improve repeatability, ergonomics, and production flow.

Feeding Options

Available with gravity feeding, automatic ejection, motorized conveyor, or bulk feeding with cart system.
